KIDS FISH

FAMILY GUIDE

Why two formats?

Paper encourages cutting, sticking, dexterity, conversation and screen-free time. Digital play needs no printer, costs nothing and requires no account. Both are equally valuable.

Two-page essential paper kit

1. An A/B/C quiz to tick or answer in writing. 2. A weekly chart with symbols to cut out and stick. Extra activities (certificate, coloring, additional pages) are optional.

For children of different ages

If I can write, I answer in my own words. Otherwise, I tick A, B or C. If I cannot hold a pencil yet, I choose and a parent ticks for me.

Chart symbols

✓ = I did it myself without a reminder. ★ = I did it with a reminder. Both mean progress. Do not use the chart as punishment. Tasks such as toothbrushing require age-appropriate adult support.

Learning benefits

Fine motor skills, independence, observation, confidence, vocabulary, ecological awareness, useful habits and shared family time.

Responsible printing

Use recycled paper if possible. Print only what you need, in black and white or ink-saving mode. Scrap paper or a hand-drawn chart works too.

And the parents?

Brush up on your environmental basics… and perhaps even relearn how to use scissors!

Our message

We will miss you while you are away from screens, but we would rather see you outside exploring nature with loved ones.

For social media

No printer? No problem! Take the quiz on our page or answer aloud with a parent, then complete a real-world mission. Never share personal information about children.

Kids Fish! We fish, we learn, we protect!
